## Education

---

### SSIPMT, Raipur

*B.Tech in Information Technology*

June 2019 – July 2023

*Raipur, C.G.*

### Bharat Mata High School, Deobhog

*Class - XII*

June 2018 – March 2019

*Deobhog, C.G.*

## Projects

---

### Portfolio Website | *HTML, CSS, JavaScript, React*

**GitHub**

- Developed a responsive portfolio website using React.js and Tailwind CSS, emphasizing clean design and efficient front-end development practices.
- Integrated third-party React libraries, such as React Icons
- Designed and developed reusable React components to maintain consistency and streamline development across the portfolio website.

### Food Ordering Website | *HTML, CSS, JavaScript, React, Tailwind-CSS*

**GitHub**

- Developed a dynamic currency tracker application using React.js, integrating real-time exchange rate data from external API
- Leveraged Swiggy's Live API to provide a seamless ordering experience, including exploring various restaurants, accessing detailed menus, and conveniently adding items to their carts.
- Enhanced the loading experience with smooth loading animations using Shimmer UI.

### Currency Tracker App | *HTML, CSS, JavaScript, React*

**GitHub**

- Developed a dynamic currency tracker application using React.js, integrating real-time exchange rate data from external API
- Implemented responsive design principles to ensure seamless performance across various devices and screen sizes.
- Showcased skills in React.js development and API integration

### Tic Tac Toe | *HTML, CSS, Javascript*

**GitHub**

- Designed and developed a fully functional Tic-Tac-Toe game application with a user-friendly interface.
- Implemented game logic to handle player moves, determine win conditions, and manage the state of the game board.
- Ensured a seamless user experience by incorporating responsive design and interactive features in the front-end components.

### Weather App | *HTML, CSS, JavaScript*

**GitHub**

- Demonstrated proficiency in front-end web development, API integration, and responsive design through project completion.
- Developed a weather application using HTML, CSS, and JavaScript.
- Utilized API (such as OpenWeatherMap) to fetch real-time weather data

## Technical Skills

---

**Languages:** HTML/CSS, JavaScript

**Developer Tools:** VS Code, Git/GitHub, Redux

**Frameworks/Libraries:** React.Js, BootStrap, Tailwind-css

## Certificates

---

**Vocational Training**

**Namaste React**
